

My Cool Snowman

Student 6b Autumn

I'm going to tell you how I made my snowman.

1. I went to the fill all box . Then to the number #0099ff.
2. Then I went to shapes , find square, color of both is number #ffffff, outline size is 3, corner radius is 2, make the square an in. up from the bottom of the screen.
3. Then I made 3 balls sizes $2\frac{1}{4}$ in. tall and 2 wide for the first ball, 2in. tall and $1\frac{1}{2}$ in. wide for the second, and $1\frac{1}{2}$ in. tall and 1 in. wide for the third. Then I put them In the middle of the page, but put them in this order: $2\frac{1}{4}$ in. tall on bottom, then the 2 in. tall in the middle, $1\frac{1}{2}$ in. tall next on top.
4. Then go to shapes, choose the straight line, and color: #663300, and the size is 8. (right arm) Draw a line about the middle going up in diagonal up about 90° angles, 2 cm. Then add a lined about $\frac{3}{4}$ the way up, going out, 1 cm. Then at the very top make one 1 cm. going up. Do the same thing for the left arm, but flipped
5. Now, on the neck, draw two lines making an X, color #66ff33, size 9.
6. Next, make the hat. Go to shapes, choose square, make one 2 cm. long and $\frac{1}{2}$ cm. tall. Another one $1\frac{1}{2}$ cm. long and 1 cm. tall. Put it on the snowman's head.
7. Now go to shapes, star, color: for both are #ffff00, outline is 3, star point is 5. They all are 2 cm. tall and 1 cm. long. Make 5. Put one in the right hand corner, one behind the right arm, one under the left arm, one with two of the arm hanging off the left side of the page, and one on the top near of the left hand corner.
8. Go to shapes, choose triangle, make the biggest side (the right side) facing the right. Make it 1 in. tall and 1 in. long.
9. Now go to shapes, circle, and make small, little circle around the outside of the triangle. Making a pill of snow balls.

That how you make my snowman!
